Subject: TCWS

Ladies & Gentlemen,

This email is to inform you that my wife and I were never notified, by TCWS in regard to any of the recent sewage spills both localized on land and spills that reached lake Wylie. We were never informed or instructed to boil our water prior to drinking and only became aware of the issue when TCWS issued an email on September 13-2013 advising that it was now safe to stop boiling the water. To little to late for my family which includes my two year old granddaughter. It is beyond comprehension that TCWS continues to operate with impunity under the watchful eyes of the agencies and officials both obligated & empowered to protect us. Especially afte the compelling presentation recently made at the rate increase hearing. It appears to those of us that continue to live this day in and day out, year after year that there is a lack of concern or interest either because of impropriety or incompetence on the part of some of our elected & appointed officials. To add insult to injury TCWS asks for a rate increase and received it time and time again. I am respectfully requesting that all of the individuals named above stop, review the facts and reflect on the damage TCWS has and will continue to do to our homes, land and lake. There is a time when a line gets crossed and action must be taken to curtail the damage. The line has been crossed and now is that time.

Sincerely,
Martin Camhi
